

WOW Search Agent

Integrate i5 Spool Files Into Web Applications!

WOW Search Agent (WSA) can attach to any WOW query operation. When the user runs the operation, they can chose to save the particular query as a Search Agent. WSA will re-run that SPECIFIC query and return the results to the user (via email) at a specified interval.

WOW Search Agent Features:

- All features of WOW Email
- Auto-population of operations
- Complete control of start dates, run times and scheduled execution
- Text, HTML or .pdf files can be emailed
- Uses Windows Task Scheduler
- Numerous examples exist such as emailing monthly invoices or statements. Sales managers could get daily updates on sales information. Purchasing managers could get immediate notification of a new purchase order.
