

WOW WYSIWYG (HTML) EDITOR

WOW HTML EDITOR allows users to create and display HTML content using a standard web browser. HTML content can be stored in a standard database and viewed like a normal web page.

This allows dynamic content applications such as Blogs, business meeting notes, Web site content, and more to be developed.

WOW WYSIWYG Editor Features:

- Create HTML Content Using Web Browsers
- Content is stored in any character field
- Include images, fonts, styles
- Create any type of content management system
- Supports sophisticated HTML editing
- Use WYSIWYG or raw HTML editors
