WOW File Serving (WFS) is a separately licensed fee-based add on to the Web Object Wizard (WOW). WFS will provide the user the ability to access (download) documents or any other type of file. Features Include:

- *Enterprise Security: By combining files with a data driven WOW application, files can be secured to authorized users.*
- *Access to any type of file such as PDF, Images, Documents, etc*
- *Serve files from the IBM I5 IFS*
- *Serve files from Windows folders*
- *Works with Web browser plug-in applications to automatically launch "helper" applications*
- *Functional with Internet Explorer and FireFox*
- *Incorporate WOW security and sign-on features*
