

WOW

GOOGLE EARTH

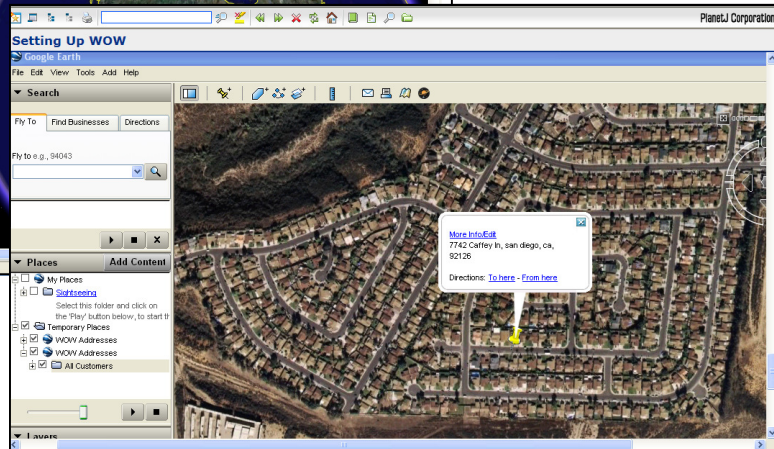

Location Data—Comes to Life!

← WOW calls necessary location data from your DB to the Web

← With WOW connecting to Google Earth, your data is populated into the application and available to pin, map and track as below. ↓

Google Earth is a free online tool that provides many useful features leveraging satellite imagery. In using WOW Google Earth, you can connect your organization's data and use these powerful Google Earth features. Track customers, vendors or sales and map out any type of area of interest. Using WOW security features, your data is always safe. You can allow mapping access to specific users or groups of users. Drill down into map to gather associated DB data.

- See landmarks surrounding your data
- Instant mapping capabilities
- Track sales/marketing initiatives
- Map customers
- Provide insurance quotes
- Connect to ANY relational database
