iSERiES DevCon 2005

Paul Holm of PlanetJ Corporation will be speaking at iSeries DevCon 2005, an intensive 3-day training event to help iSeries technical professionals build, modernize, maintain, or Web-enable their applications. It takes place November 7 – 9 at the Rio Hotel and Casino in Las Vegas. You'll find Paul delivering the following sessions:

- Harness the Power of the Java Toolbox
- Leverage iSeries Java Tools to Create Web Applications
- Java RAD: Five Techniques to Raise Your Java Development Productivity
- Develop 20 Times Faster: Techniques to Leverage JavaBeans and OO Technology

As well as the intensive Jumpstart session, "Java and WebSphere: A Guide to Developing iSeries Web Applications."

iSeries DevCon 2005 offers in-depth training – with more than 50 technical sessions to advance your developer skills in Java, RPG IV, ILE, XML, WDSC, SQL and more. To view all the complete session details go to http://www.iseries400experts.com/devcon/sessions

To view the entire conference brochure, visit http://devcon.iseries400experts.com/DevCon2005brochure.pdf
